PROJECTS

CRM – Student Management System | Java, Spring Boot, Thymeleaf, MySQL

Dec 2024 – Ongoing

- A full-stack CRM system built to streamline student course management, role-based access, and secure payment integration.
- Focused on enhancing admin and employee efficiency through an interactive dashboard and structured workflows

Student Result Management System | Java (JSP/Servlet), MySQL

Aug 2024 – Oct 2024

- A web-based system designed for publishing and managing student results securely.
- Enabled students to view/download results and allowed admins to maintain academic records efficiently

Agriculture Website | HTML, CSS, JavaScript

June 2024

- A digital platform created to connect farmers, agri-entrepreneurs, and consumers for trading crops, seeds, and equipment
- Designed with the aim of expanding into real-time weather updates and government schemes

Achievements

- Secured **3rd Position** in **ScholarHat Hackathon**
- Solved **200+ Problems** on **LeetCode**
- Achieved **1200 Contest Rating** in 6 contests on **CodeChef**

Certifications

- **Problem Solving (Basic)** – HackerRank
- **Java (Basic)** – HackerRank
- **Spring Boot** – Smart Programming

Extracurricular Activities

- Active member of **Coding Club**, **ABES Engineering College**
